WORK EXPERIENCE

Developer front-end junior (angular, typescript)

API gateway - (February 2022 -April 2022)

- It was created Pages for login, registration, forgotten password, reset password, microservices, group user, user.
- I connected each page created with the backend using Angular Typescript.

Freelance (node.js, node.express, javascript) (may 2022)

- i sended information to the backend using node.js and node express technologies.
- This information needed to have the user's IP address, a request ID, and a secure backend port to use.

PROJECTS

Expense Control | React , Html, Css, Javascript, node.js, node express | -->

<https://www.linkedin.com/feed/update/urn:li:activity:6937486246625619968/>

- I used react to create the frontend and connect to the backend.
- i used node.js with node express to create an api and do the whole application.

User Authentication | ejs , Html, Css, Javascript, node.js, node express, MySQL, JWT | -->

<https://www.linkedin.com/feed/update/urn:li:activity:6940507228466515968/>

- I used node to create an API capable of registering and logging in users.
- I create a system to keep the user logged in automatically
- I created a database to register and save user information, thus encoding the password of the registered user.

AUS website | Angular, Html, Css, Bootstrap-->

<https://willcordeiro.github.io/AUSmainPage/>

- I used css to create responsiveness and apply Mobile First.
