WORK EXPERIENCE

Front end junior developer

(February 2022 - April 2022)

- A friend's personal project (gateway api).

- It was created login page, account creation, forget password, and email request Pages.

- It was connected each page created with the backend (Java, Springboot, PostegreSQL) using Angular Typescript.

- It was created micro-service, group User, user pages and them it was connected to the backend using Angular Typescript.

PROJECTS

William Cordeiro Portfolio | Angular, Html, Css, Bootstrap, Javascript |
--> https://willcordeiro.github.io/williamCordeiroPortfolio/

My personal portfolio created to showcase my skills with css, html and javascript.

- I used several css classes to assign effects and appearances to the html.

- I used javascript to apply the Scroll Reveal and Dark Mode effect on the portfolio.

- I modified an Angular component with typescript to be able to use the <script> tag in angular.

- I used css with grid to create responsiveness and apply Mobile First.

AUS Website | Angular, Html, Css, Bootstrap |
--> https://willcordeiro.github.io/AUSmainPage/

Dummy website used to show responsiveness with grid and personal design as a test for website creation.

- I used grid in css to add responsiveness and visual effects to the website.

- I created a website with modern styles.
